To Whom It May Concern

I am pleased to write this letter of recommendation for Md Ashraful Hasan in support of his application for any potential academic or professional prospects. I had the honor of teaching Md Ashraful Hasan two courses and a capstone project at East West University.

Throughout his classes in "Electronic Circuits" and "Digital Logic Design" courses, Md. Ashraful Hasan demonstrated a driven aptitude for the material. He showed a promising ability to apply circuit concepts to real-world situations in addition to his proficiency with circuit concepts. Throughout class discussions and hands-on exercises, he demonstrated a solid grasp of combinational and sequential logic as well as digital system architecture. Through the accomplishment of an outstanding capstone project titled "Bangladeshi Road Sign Detection Using Deep Learning Technique for Driver Assistance System", he has proven to be extremely intelligent in the areas of image processing and machine learning. He demonstrates his high level of knowledge and analytical strength in these disciplines with his exceptional comprehension and skillful implementation of complex procedures.

In addition to his outstanding academic record, Md. Ashraful Hasan improved the environment in the classroom. He demonstrated great communication and teamwork abilities by actively participating in collaborative projects. His capacity to communicate difficult ideas succinctly and clearly helped the learning environment as a whole.

I believe that Md. Ashraful Hasan would be a valuable addition to any academic or professional setting because of his knowledge, abilities, and enthusiasm for digital logic and machine learning. He constantly demonstrated a commitment to excellence and an eagerness to learn, traits that would help him succeed in his future undertakings.

If I can be of any further assistance or provide you with any further information, please feel free to contact me.

Sincerely,

.....
Musharrat Khan
Senior Lecturer
